QNUK Level 2 Award in Mental Health at Work (RQF)  
1 day (6hr) course

## Overview

In any one year 1 in 4 people will suffer from a mental health issue, and in any one week 1 in 6 employees will report a work-related mental health concern. This course will provide you with an understanding of some of the most common mental health disorders, what causes them, how to spot someone suffering from them and the various ways in which help and support can be accessed from specialist services. Your knowledge will enable you to help and support your family, friends or colleagues, as well as learn tips and techniques for looking after your own mental health and wellbeing. In addition to the content on the Level 1 course you will look at harmful coping strategies including substance abuse, eating disorders and self harm and develop skills in starting a conversation around mental ill health.
